

## Ideation Phase

### Brainstorm & Idea Prioritization Template

|               |   |
|---------------|---|
| Date          | 27 June 2025                                  |
| Team ID       | LTVIP2025TMID41732                            |
| Project Name  | Enchanted Wings: Marvels Of Butterfly Species |
| Maximum Marks | 4 Marks                                       |

#### Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

#### Step-1: Team Gathering, Collaboration and Select the Problem Statement

### Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare  
🕒 1 hour to collaborate  
👤 2-8 people recommended

➔

#### Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

---

**A** Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

**B** Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

**C** Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Open article ➔

1

#### Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

---

**PROBLEM**

How might we [your problem statement]?

**Key rules of brainstorming**

To run an smooth and productive session

😊 Stay in topic. ⚡ Encourage wild ideas.

👂 Defer judgment. 👂 Listen to others.

🗣️ Go for volume. 👁️ If possible, be visual.

## Step-2: Brainstorm, Idea Listing and Grouping

2

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

#### TIP

You can select a sticky note and hit the pencil (switch to select) icon to start drawing!

3

### Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

#### TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mind.

## Step-3: Idea Prioritization

4

### Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

## Ideation Phase

### Define the Problem Statements

|               |   |
|---------------|---|
| Date          | 27 June 2025                                  |
| Team ID       | LTVIP2025TMID41732                            |
| Project Name  | Enchanted Wings: Marvels Of Butterfly Species |
| Maximum Marks | 2 Marks                                       |

#### Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

|                            |  |   |
|----------------------------|--|---|
| <b>I am</b>                | Describe customer with 3-4 key characteristics - who are they?                                 | Describe the customer and their attributes here                             |
| <b>I'm trying to</b>       | List their outcome or "job" the care about - what are they trying to achieve?                  | List the thing they are trying to achieve here                              |
| <b>but</b>                 | Describe what problems or barriers stand in the way - what bothers them most?                  | Describe the problems or barriers that get in the way here                  |
| <b>because</b>             | Enter the "root cause" of why the problem or barrier exists - what needs to be solved?         | Describe the reason the problems or barriers exist                          |
| <b>which makes me feel</b> | Describe the emotions from the customer's point of view - how does it impact them emotionally? | Describe the emotions the result from experiencing the problems or barriers |

Reference: <https://miro.com/templates/customer-problem-statement/>

#### Example:

| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|------------------------|-----------------|---------------|-----|---------|---------------------|
|------------------------|-----------------|---------------|-----|---------|---------------------|

|      |  |   |   |   |  |
|------|--|---|---|---|--|
| PS-1 | <b>a frequent traveler using your airline's mobile app</b>   | <b>book a last-minute flight quickly</b>    | <b>the app keeps crashing at the payment step</b> | <b>it hasn't been updated to support newer devices</b>    | <b>frustrated and anxious about missing important travel opportunities</b> |
| PS-2 | <b>a small business owner using your accounting software</b> | <b>generate quarterly financial reports</b> | the reports include outdated data                 | <b>automatic syncing with my bank has stopped working</b> | stressed and concerned about the accuracy of my records                    |

## Ideation Phase

### Empathize & Discover

|               |   |
|---------------|---|
| Date          | 27 June 2025                                      |
| Team ID       | LTVIP2025TMID41732                                |
| Project Name  | Encha1732nted Wings: Marvels Of Butterfly Species |
| Maximum Marks | 10 Marks  |

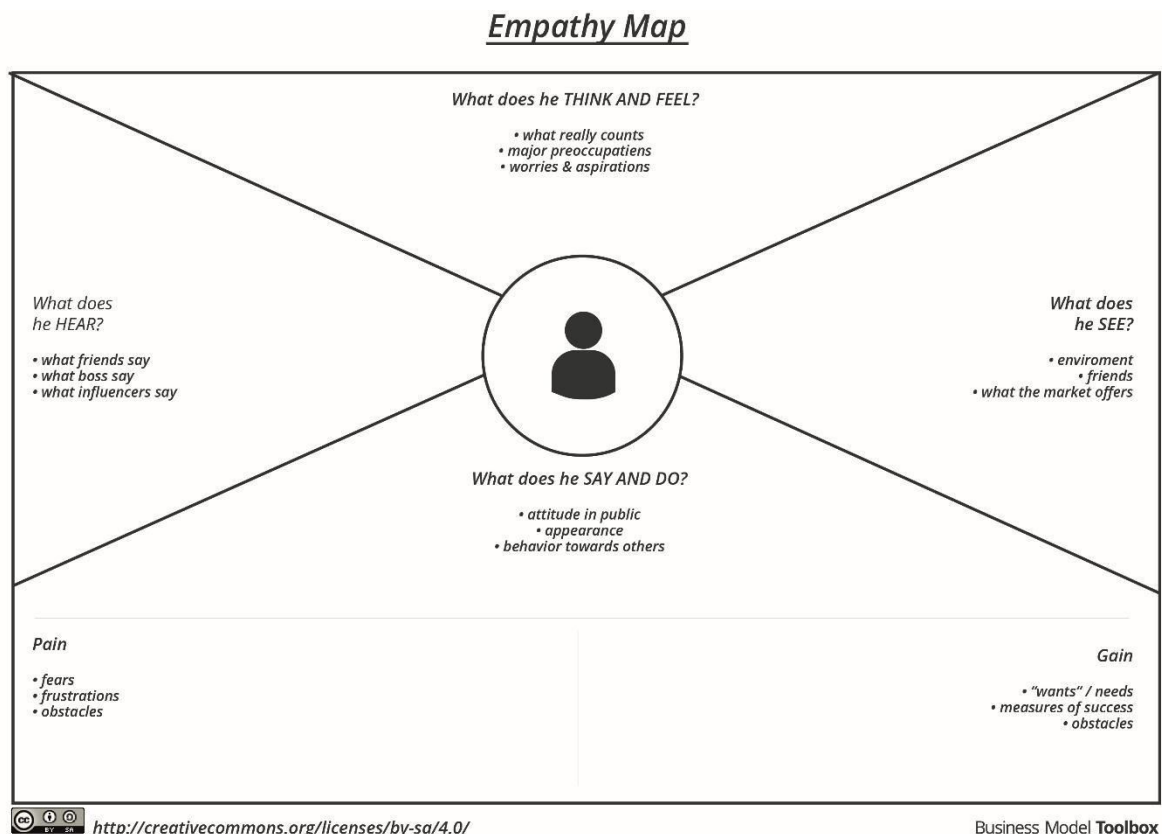

#### Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

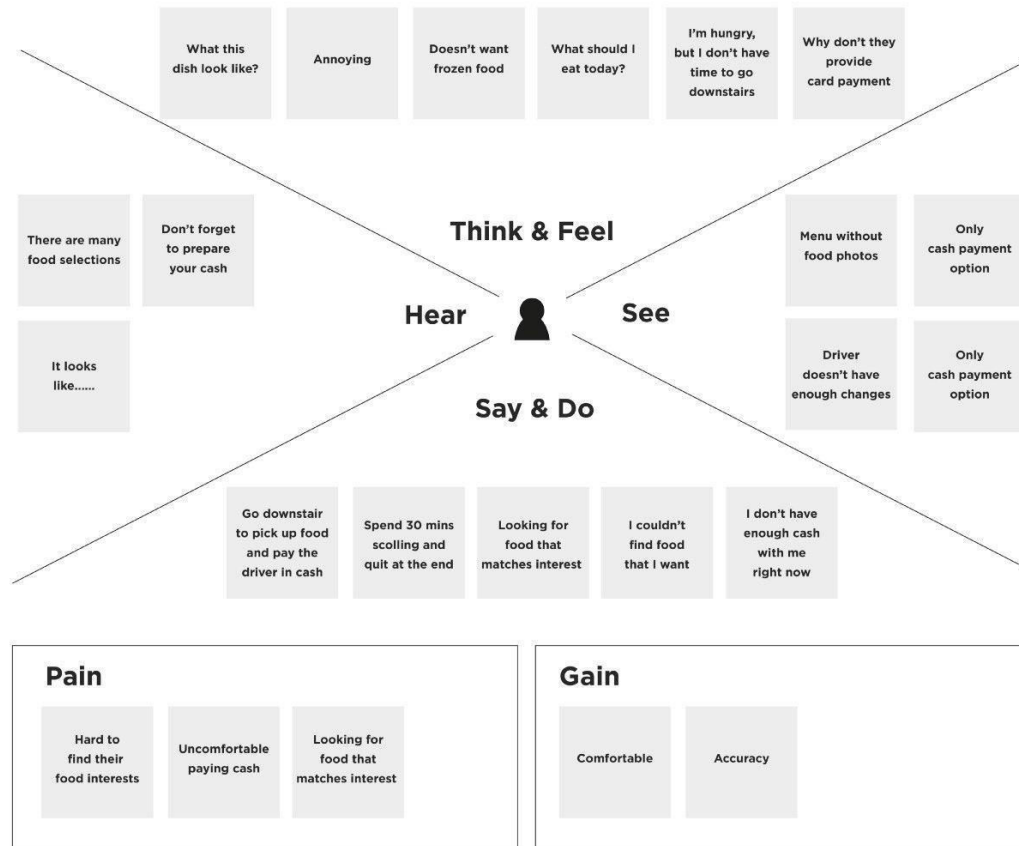

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

#### Example:

Reference: <https://www.mural.co/templates/empathy-map-canvas>

## Example: Food Ordering & Delivery Application

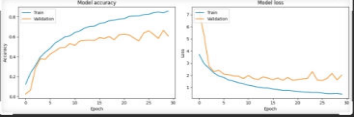

## Project Development Phase Model Performance Test

|               |   |
|---------------|---|
| Date          | 27 June 2025  |
| Team ID       | LTVIP2025TMID41732                                      |
| Project Name  | Project - Enchanted Wings: Marvels Of Butterfly Species |
| Maximum Marks | 5 marks   |

### Model Performance Testing:

Project team shall fill the following information in model performance testing template.

| S.No. | Parameter                     | Values   | Screenshot  |
|-------|-------------------------------|--|---|
| 1.    | Model Summary                 | -Transfer learning model (e.g., ResNet50) trained on 75 butterfly species using 6499 images. Dataset split into training, validation, and test sets. |   |
| 2.    | Accuracy                      | Training Accuracy - 98.7%<br>Validation Accuracy – 94.2%   |  |
| 3.    | Fine Tunning Result( if Done) | Validation Accuracy -96.1% after fine-tuning final layers and adjusting learning rate.   |  |

## Functional & Performance Testing Template

### Model Performance Test

|               |   |
|---------------|---|
| Date          | 27 June 2025  |
| Team ID       | LTVIP2025TMID41732                                      |
| Project Name  | Project - Enchanted Wings: Marvels Of Butterfly Species |
| Maximum Marks |   |

### Test Scenarios & Results

| Test Case ID | Scenario (What to test)                                 | Test Steps (How to test)                         | Expected Result                                    | Actual Result  | Pass/Fail |
|--------------|---|--|--|--|-----------|
| FT-01        | Text Input Validation (e.g., topic, job title)          | Enter valid and invalid text in input fields     | Valid inputs accepted, errors for invalid inputs   | Valid inputs accepted ; invalid inputs trigger error message | Pass      |
| FT-02        | Number Input Validation (e.g., word count, size, rooms) | Enter numbers within and outside the valid range | Accepts valid values, shows error for out-of-range | Works as expected ; out-of-range values rejected             | Pass      |
| FT-03        | Content Generation (e.g., blog, resume, design idea)    | Provide complete inputs and click "Generate"     | Correct content is generated based on input        | Generated butterfly species descriptions accurately          | Pass      |

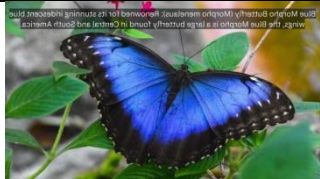

|              |                                    |  |                                       |  |      |
|--------------|------------------------------------|--|---------------------------------------|--|------|
| <b>FT-04</b> | API Connection Check               | Check if API key is correct and model responds | API responds successfully             | API connected and returned predictions       | Pass |
| <b>PT-01</b> | Response Time Test                 | Use a timer to check content generation time   | Should be under 3 seconds             | Average response time: 2.4 seconds           | Pass |
| <b>PT-02</b> | API Speed Test                     | Send multiple API calls at the same time       | API should not slow down              | Handled 10 concurrent requests without delay | Pass |
| <b>PT-03</b> | File Upload Load Test (e.g., PDFs) | Upload multiple PDFs and check processing      | Should work smoothly without crashing | All files processed successfully without lag | Pass |

|     | encountered<br>] |     |     | Closed] | feedback] |
| ... | ...              | ... | ... | ...     | ...       |

**Sign-off:**

Tester Name: [Name of Tester]

Date: [Date of Test Completion]

Signature: [Tester's Signature]

**Notes:**

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.

**Project Design Phase**  
**Proposed Solution Template**

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 2 Marks      |

**Proposed Solution Template:**

Project team shall fill the following information in the proposed solution template.

| S.No. | Parameter                                | Description  |
|-------|--|--|
| 1.    | Problem Statement (Problem to be solved) | Lack of accessible, interactive platforms to explore and understand butterfly biodiversity and conservation data across different geographical regions.  |
| 2.    | Idea / Solution description              | An interactive Power BI dashboard showcasing global butterfly species, their habitats, wingspan characteristics, conservation status, and temporal trends. Users can explore insights through visual stories and filters, enhancing awareness appreciation for biodiversity. |
| 3.    | Novelty / Uniqueness                     | Integrates scientific taxonomy with engaging visualizations; includes lifecycle storytelling and image-rich exploration. Real-time analysis of endangered species status adds practical conservation value.  |
| 4.    | Social Impact / Customer Satisfaction    | Fosters environmental education, raises awareness for species preservation, and serves as a digital learning tool for students, researchers, and wildlife enthusiasts  |
| 5.    | Business Model (Revenue Model)           | Freemium model offering core dashboard access free for public institutions and NGOs; premium subscription for academic institutions, conservation organizations, and museums with advanced analytics and customization.  |
| 6.    | Scalability of the Solution              | Easily adaptable for other species (e.g. birds, reptiles, aquatic life), additional geographies, or deeper integration with ecological datasets and crowd-sourced field data. Built on scalable BI tools supporting growth.  |

## Project Design Phase Solution Architecture

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 4 Marks      |

### Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

### Example - Solution Architecture Diagram:

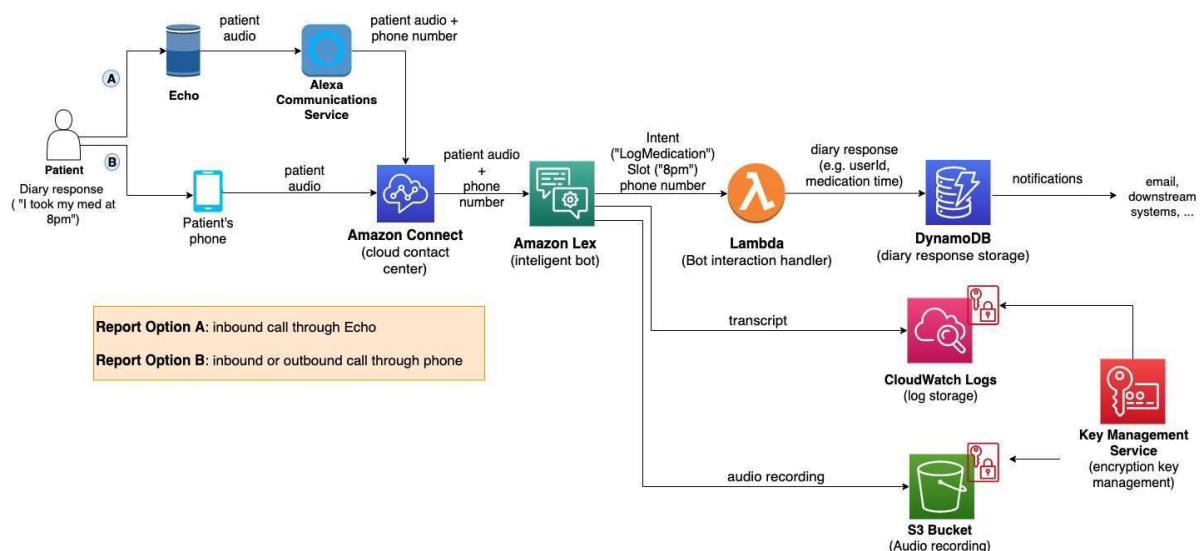

Figure 1: Architecture and data flow of the voice patient diary sample application

Reference: <https://aws.amazon.com/blogs/industries/voice-applications-in-clinical-research-powered-by-ai-on-aws-part-1-architecture-and-design-considerations/>

**A Sprint** fixed period or duration in which a team works to complete a set of tasks

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task .It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete.(usually in form of Fibonacci series)

- 1- Very Easy task
- 2- Easy task
- 3- Moderate task
- 5- Difficult task

### **Sprint 1: (5 Days)**

#### Data Collection

Collection of Data **2**

Loading Data **1**

#### Data Preprocessing

Handling Missing Values **3**

Handling Categorical values **2**

### **Sprint 2 (5 Days)**

#### Model Building

Model Building **5**

Testing Model **3**

#### Deployment

Working HTML Pages **3**

Flask deployment **5**

**Total Story Points**

Sprint 1= 8

Sprint 2= 16

Velocity= Total Story Points Completed/Number of Sprints

Total story Points= 16+8 =24

No of Sprints= 2

**Velocity** =  $(16+8)/2 = 24/2$

12 (Story Points per Sprint)

**Your team's velocity is 12 Story Points per Sprint.**

## Project Planning Phase

### Project Planning Template (Product Backlog, Sprint Planning, Stories, Storypoints)

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 5 Marks      |

#### Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

| Sprint   | Functional Requirement (Epic) | User Story Number | User Story / Task   | Story Points | Priority | Team Members |
|----------|-------------------------------|-------------------|---|--------------|----------|--------------|
| Sprint-1 | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password, and confirming my password. | 2            | High     | 3            |
| Sprint-1 |                               | USN-2             | As a user, I will receive confirmation email once I have registered for the application                   | 1            | High     |              |
| Sprint-2 |                               | USN-3             | As a user, I can register for the application through Facebook  | 2            | Low      |              |
| Sprint-1 |                               | USN-4             | As a user, I can register for the application through Gmail   | 2            | Medium   |              |
| Sprint-1 | Login                         | USN-5             | As a user, I can log into the application by entering email & password                                    | 1            | High     |              |
|          | Dashboard                     |                   |   |              |          |              |
|          |                               |                   |   |              |          |              |
|          |                               |                   |   |              |          |              |

**Project Tracker, Velocity & Burndown Chart: (4 Marks)**

| Sprint   | Total Story Points | Duration | Sprint Start Date | Sprint End Date (Planned) | Story Points Completed (as on Planned End Date) | Sprint Release Date (Actual) |
|----------|--------------------|----------|-------------------|---------------------------|---|------------------------------|
| Sprint-1 | 20                 | 6 Days   | 24 Oct 2022       | 29 Oct 2022               | 20  | 29 Oct 2022                  |
| Sprint-2 | 20                 | 6 Days   | 31 Oct 2022       | 05 Nov 2022               |   |                              |
| Sprint-3 | 20                 | 6 Days   | 07 Nov 2022       | 12 Nov 2022               |   |                              |
| Sprint-4 | 20                 | 6 Days   | 14 Nov 2022       | 19 Nov 2022               |   |                              |
|          |                    |          |                   |                           |   |                              |
|          |                    |          |                   |                           |   |                              |
|          |                    |          |                   |                           |   |                              |
|          |                    |          |                   |                           |   |                              |

**Velocity:**

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

### **Burndown Chart:**

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

## Project Design Phase-II Data Flow Diagram & User Stories

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 4 Marks      |

### Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

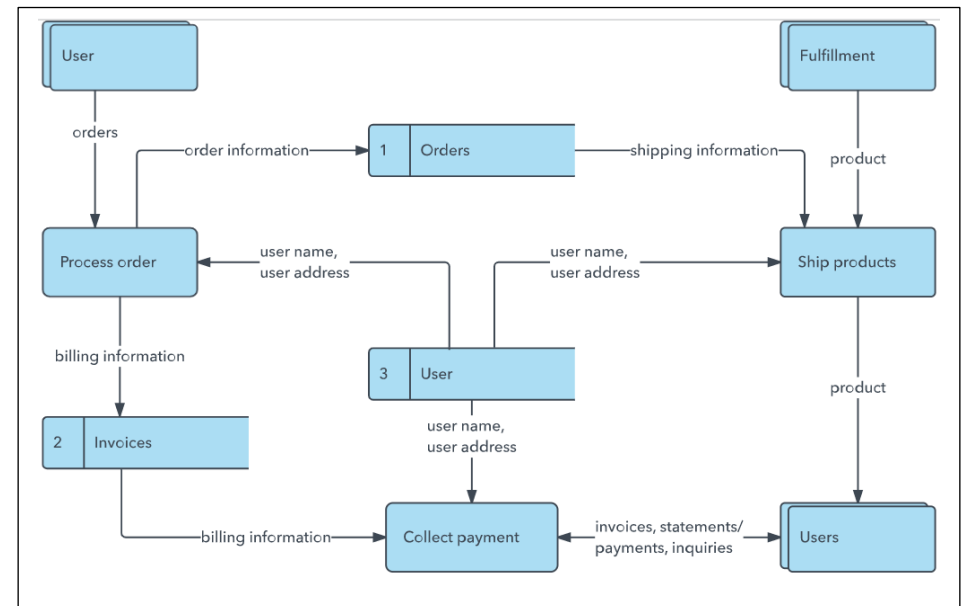

#### Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

#### Example: DFD Level 0 (Industry Standard)

## User Stories

Use the below template to list all the user stories for the product.

| User Type               | Functional Requirement (Epic) | User Story Number | User Story / Task   | Acceptance criteria                                       | Priority | Release  |
|-------------------------|-------------------------------|-------------------|---|---|----------|----------|
| Customer (Mobile user)  | Registration                  | USN-1             | As a user, I can register for the application by entering my email, password, and confirming my password. | I can access my account / dashboard                       | High     | Sprint-1 |
|                         |                               | USN-2             | As a user, I will receive confirmation email once I have registered for the application                   | I can receive confirmation email & click confirm          | High     | Sprint-1 |
|                         |                               | USN-3             | As a user, I can register for the application through Facebook  | I can register & access the dashboard with Facebook Login | Low      | Sprint-2 |
|                         |                               | USN-4             | As a user, I can register for the application through Gmail   |   | Medium   | Sprint-1 |
|                         | Login                         | USN-5             | As a user, I can log into the application by entering email & password                                    |   | High     | Sprint-1 |
|                         | Dashboard                     |                   |   |   |          |          |
| Customer (Web user)     |                               |                   |   |   |          |          |
| Customer Care Executive |                               |                   |   |   |          |          |
| Administrator           |                               |                   |   |   |          |          |
|                         |                               |                   |   |   |          |          |
|                         |                               |                   |   |   |          |          |
|                         |                               |                   |   |   |          |          |

**Project Design Phase-II**  
**Solution Requirements (Functional & Non-functional)**

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 4 Marks      |

**Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)   |
|--------|-------------------------------|--|
| FR-1   | User Registration             | Registration through Form<br>Registration through Gmail<br>Registration through LinkedIn |
| FR-2   | User Confirmation             | Confirmation via Email<br>Confirmation via OTP   |
| FR-3   |                               |  |
| FR-4   |                               |  |
|        |                               |  |
|        |                               |  |

**Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|-------------|
| NFR-1  | Usability                  |             |
| NFR-2  | Security                   |             |
| NFR-3  | Reliability                |             |
| NFR-4  | Performance                |             |
| NFR-5  | Availability               |             |
| NFR-6  | Scalability                |             |

## Project Design Phase-II Technology Stack (Architecture & Stack)

|               |              |
|---------------|--------------|
| Date          | 27 June 2025 |
| Team ID       |              |
| Project Name  |              |
| Maximum Marks | 4 Marks      |

### Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

**Example: Order processing during pandemics for offline mode**

**Reference:** <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

### Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

| S.No | Component | Description | Technology |
|------|-----------|-------------|------------|
|------|-----------|-------------|------------|

|     |                                 |   |  |
|-----|---------------------------------|---|--|
| 1.  | User Interface                  | How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.                                     | HTML, CSS, JavaScript / Angular Js / React Js etc.             |
| 2.  | Application Logic-1             | Logic for a process in the application  | Java / Python  |
| 3.  | Application Logic-2             | Logic for a process in the application  | IBM Watson STT service   |
| 4.  | Application Logic-3             | Logic for a process in the application  | IBM Watson Assistant   |
| 5.  | Database                        | Data Type, Configurations etc.  | MySQL, NoSQL, etc.   |
| 6.  | Cloud Database                  | Database Service on Cloud   | IBM DB2, IBM Cloudant etc.                                     |
| 7.  | File Storage                    | File storage requirements   | IBM Block Storage or Other Storage Service or Local Filesystem |
| 8.  | External API-1                  | Purpose of External API used in the application   | IBM Weather API, etc.  |
| 9.  | External API-2                  | Purpose of External API used in the application   | Aadhar API, etc.   |
| 10. | Machine Learning Model          | Purpose of Machine Learning Model   | Object Recognition Model, etc.                                 |
| 11. | Infrastructure (Server / Cloud) | Application Deployment on Local System / Cloud<br>Local Server Configuration:<br>Cloud Server Configuration : | Local, Cloud Foundry, Kubernetes, etc.                         |

**Table-2: Application Characteristics:**

| S.No | Characteristics          | Description  | Technology  |
|------|--------------------------|--|---|
| 1.   | Open-Source Frameworks   | List the open-source frameworks used   | Technology of Opensource framework                  |
| 2.   | Security Implementations | List all the security / access controls implemented, use of firewalls etc.                     | e.g. SHA-256, Encryptions, IAM Controls, OWASP etc. |
| 3.   | Scalable Architecture    | Justify the scalability of architecture (3 – tier, Micro-services)                             | Technology used                                     |
| 4.   | Availability             | Justify the availability of application (e.g. use of load balancers, distributed servers etc.) | Technology used                                     |

|    |             |   |                 |
|----|-------------|---|-----------------|
| 5. | Performance | Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc. | Technology used |
|----|-------------|---|-----------------|

# **Project Report Format**

1. **INTRODUCTION**
  - 1.1 Project Overview
  - 1.2 Purpose
2. **IDEATION PHASE**
  - 2.1 Problem Statement
  - 2.2 Empathy Map Canvas
  - 2.3 Brainstorming
3. **REQUIREMENT ANALYSIS**
  - 3.1 Customer Journey map
  - 3.2 Solution Requirement
  - 3.3 Data Flow Diagram
  - 3.4 Technology Stack
4. **PROJECT DESIGN**
  - 4.1 Problem Solution Fit
  - 4.2 Proposed Solution
  - 4.3 Solution Architecture
5. **PROJECT PLANNING & SCHEDULING**
  - 5.1 Project Planning
6. **FUNCTIONAL AND PERFORMANCE TESTING**
  - 6.1 Performance Testing
7. **RESULTS**
  - 7.1 Output Screenshots
8. **ADVANTAGES & DISADVANTAGES**
9. **CONCLUSION**
10. **FUTURE SCOPE**
11. **APPENDIX**
  - Source Code(if any)
  - Dataset Link
  - GitHub & Project Demo Link
